Carrer Bridge Iteration 2 Status Summary

Current Implementation Status

60% done. The majority of use cases are currently implemented. The process to register and apply to be a recruiter/organization and responses to a submitted application are the main action items that need to be completed.

Notable Roadblocks

None

Screenshots of UI

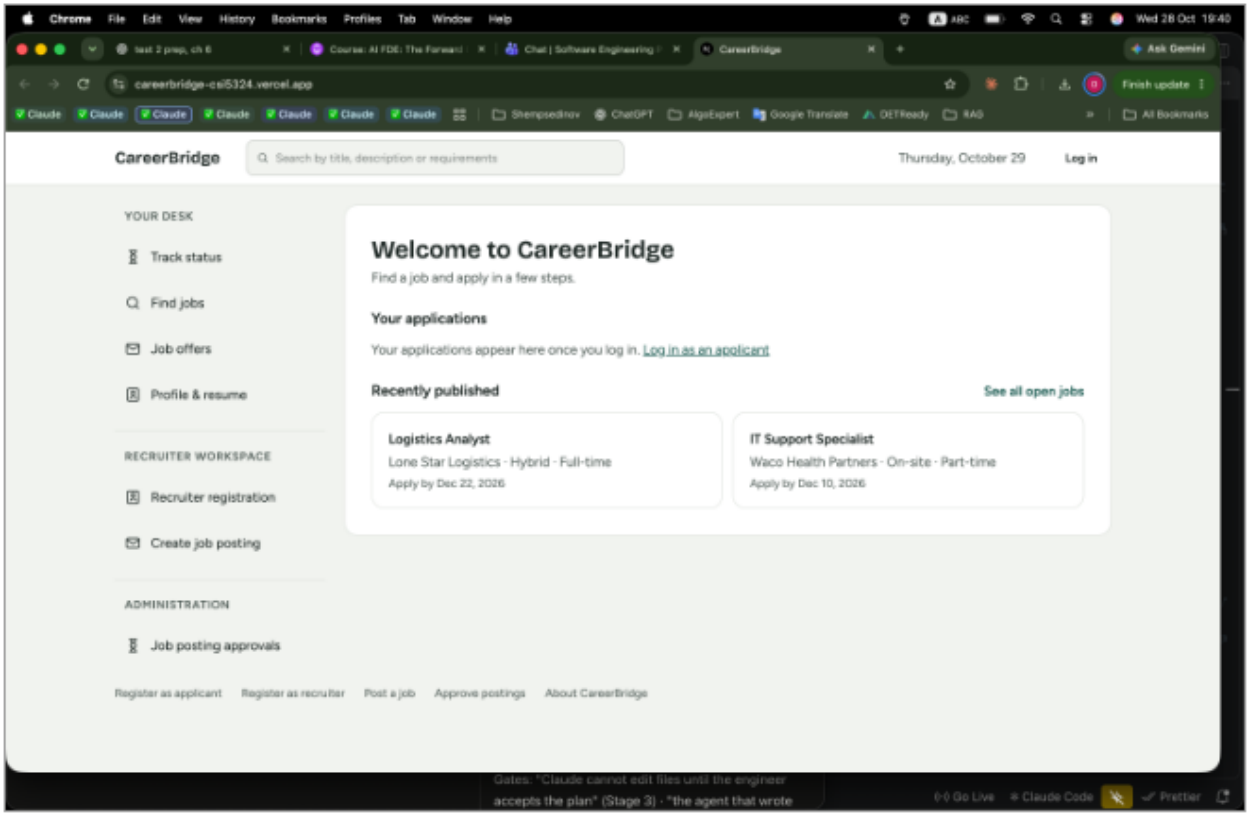

Table 12.1 lists all 17 screens that exist: 14 are connected to the application layer (one only partly) and 3 are placeholders. Screens S1 to S11 are screenshots of the live site. S12 to S17 were captured from a local run of main at commit 71aef4b on the in-memory database with the documented demo accounts, as the live demo accounts are not available to every member. Browser tabs and bookmarks were removed from the live screenshots. No form was submitted when capturing S12 to S17. The two later commits (pull requests #87 and #88) changed tests, configuration and dependencies, not screen code. Implementer names come from git commit history on main, not from Jira.

Table 12.1: Implemented screens

#	Route	Screen	Use case	Application layer
S1	`/`	Home, visitor not logged in	UC-01 Search Job Postings	Connected
S2	`/login`	Log in	Log In (supporting function, no use case number)	Connected
S3	`/`	Home, logged in as an applicant	UC-04 Apply for Job	Partly connected
S4	`/profile`	Profile and resume, personal information	UC-03 Update Applicant Profile	Connected
S5	`/profile`	Profile and resume, resume upload (scrolled)	UC-03 Update Applicant Profile	Connected
S6	`/jobs`	Open job postings	UC-01 Search Job Postings	Connected
S7	`/jobs?keyword=spe`	Search results for the keyword “spe”	UC-01 Search Job Postings	Connected
S8	`/jobs/4`	Job posting details	UC-01 Search Job Postings	Connected
S9	`/jobs/4/apply`	Apply for the job, before confirming	UC-04 Apply for Job	Connected
S10	`/jobs/4/apply`	Apply for the job, confirmed	UC-04 Apply for Job	Connected
S11	`/jobs/4/apply`	Application submitted	UC-04 Apply for Job	Connected
S12	`/register`	Register as an applicant	UC-02 Register as Applicant	Connected
S13	`/recruiter/postings/new`	Create job posting (recruiter)	UC-11 Create Job Posting	Connected
S14	`/admin/postings`	Job posting approvals (administrator)	UC-12 Approve Job Posting	Connected
S15	`/applications`	Track status (placeholder)	UC-05 Track Application Status	Not connected
S16	`/offers`	Job offers (placeholder)	UC-07 Respond to Job Offer	Not connected
S17	`/recruiter/register`	Recruiter registration (placeholder)	UC-08 Register Recruiter and Organization	Not connected

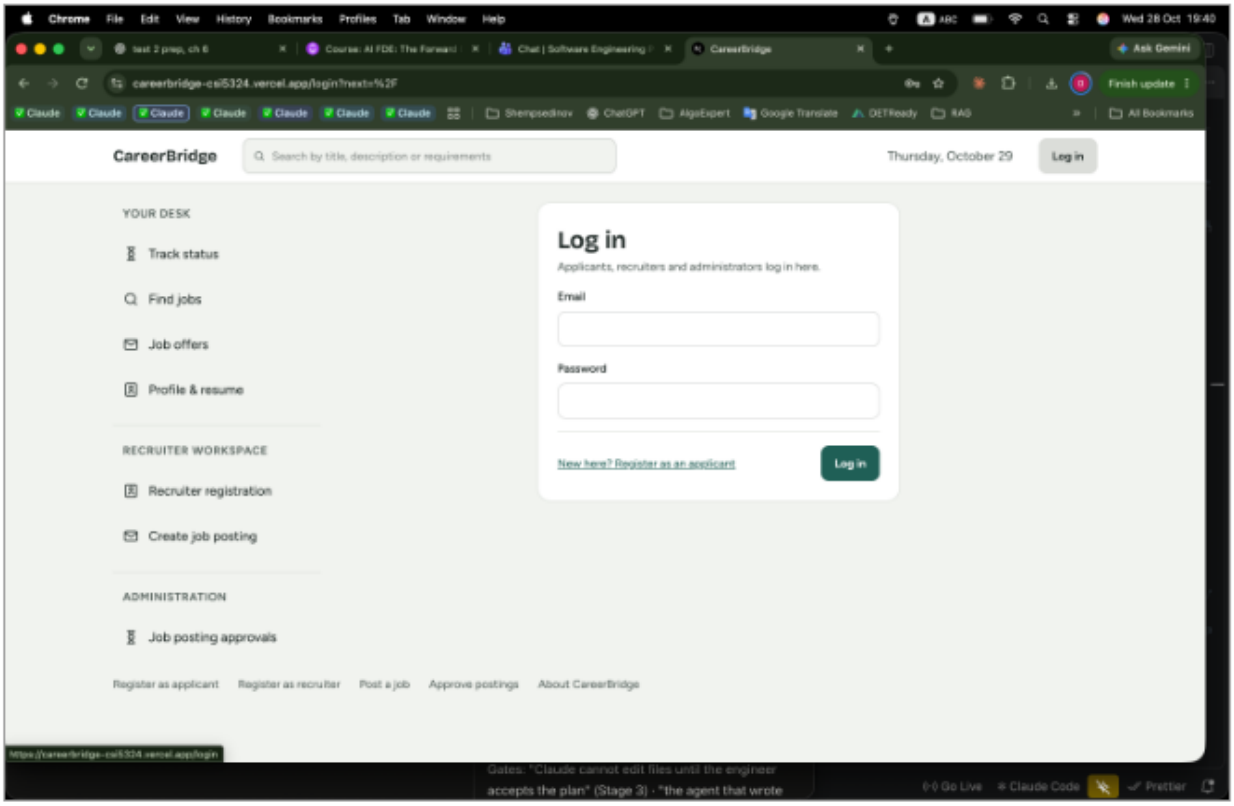

S1. Home, visitor not logged in

Use case	UC-01 Search Job Postings
Use case owner	Oleg Berdyshev
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** "Recently published" is read from the backend.
Route / source	`/; live site, careerbridge-csi5324.vercel.app/`

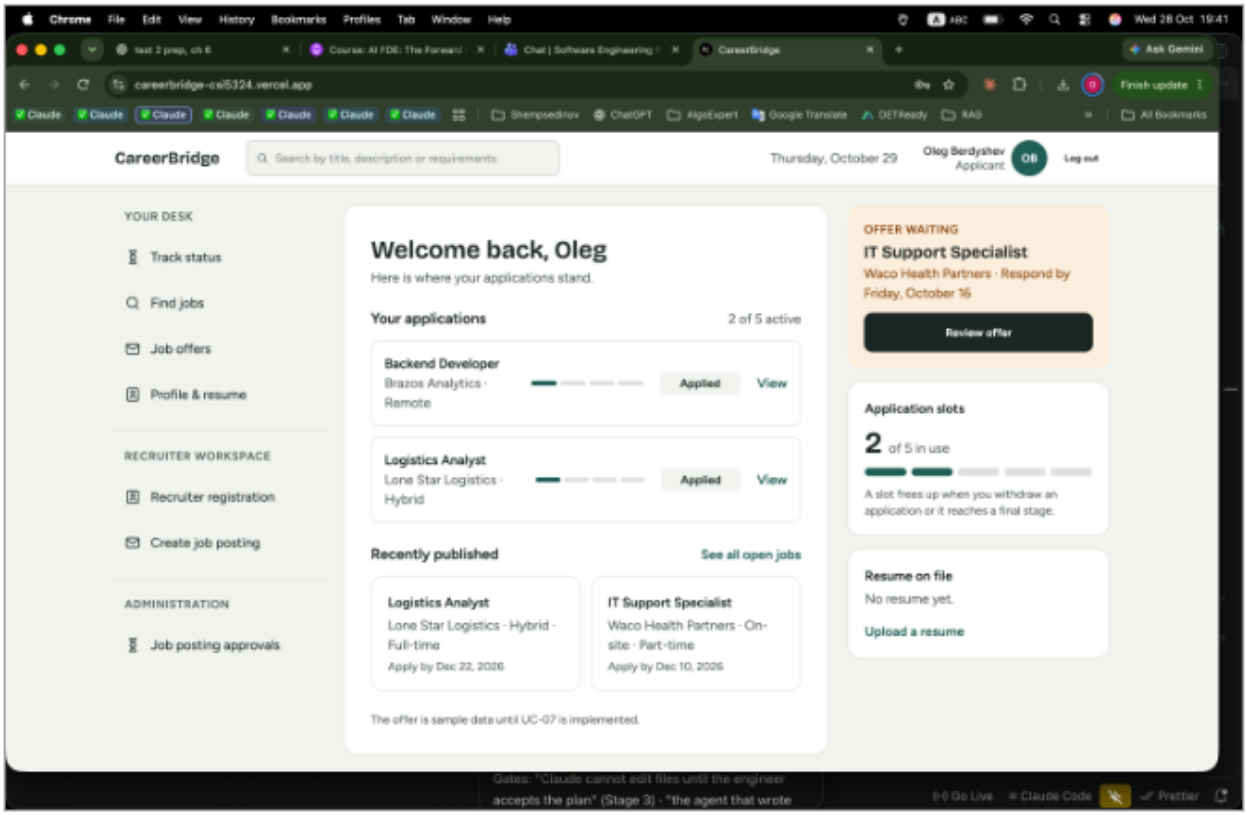

S2. Log in

Use case	Log In (supporting function, no use case number)
Use case owner	Not assigned in the use case table
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** Signed token, lockout after repeated failures, one account per role.
Route / source	`/login; live site, careerbridge-csi5324.vercel.app/login`

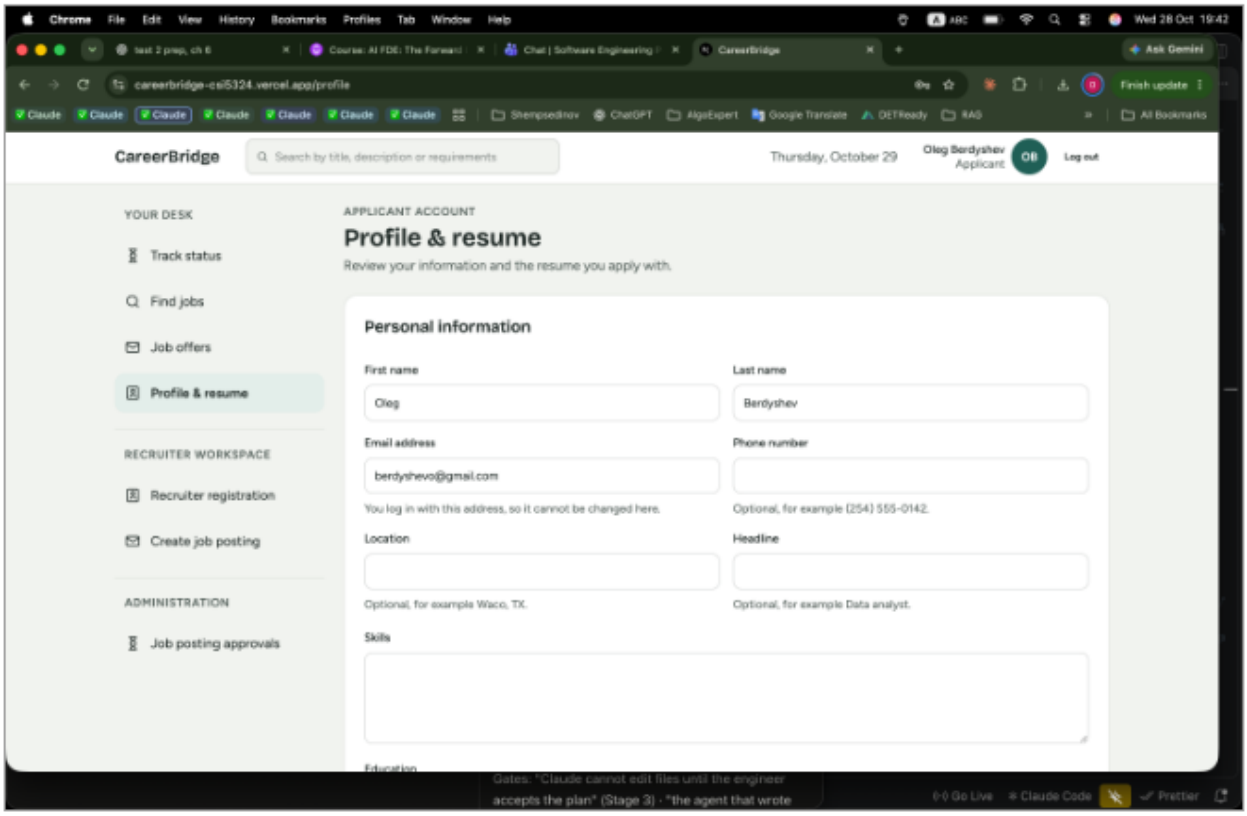

S3. Home, logged in as an applicant

Use case	UC-04 Apply for Job (applications and slots); UC-03 (resume on file); UC-07 (offer panel)
Use case owner	Josh Job Joseph (UC-04); Oleg Berdyshev (UC-03); Rabeya Nazara (UC-07)
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Partly connected.** Applications list, slot meter and resume block come from the backend. The "Offer waiting" panel is sample data until UC-07 is built, as the page says.
Route / source	`/; live site, careerbridge-csi5324.vercel.app/`

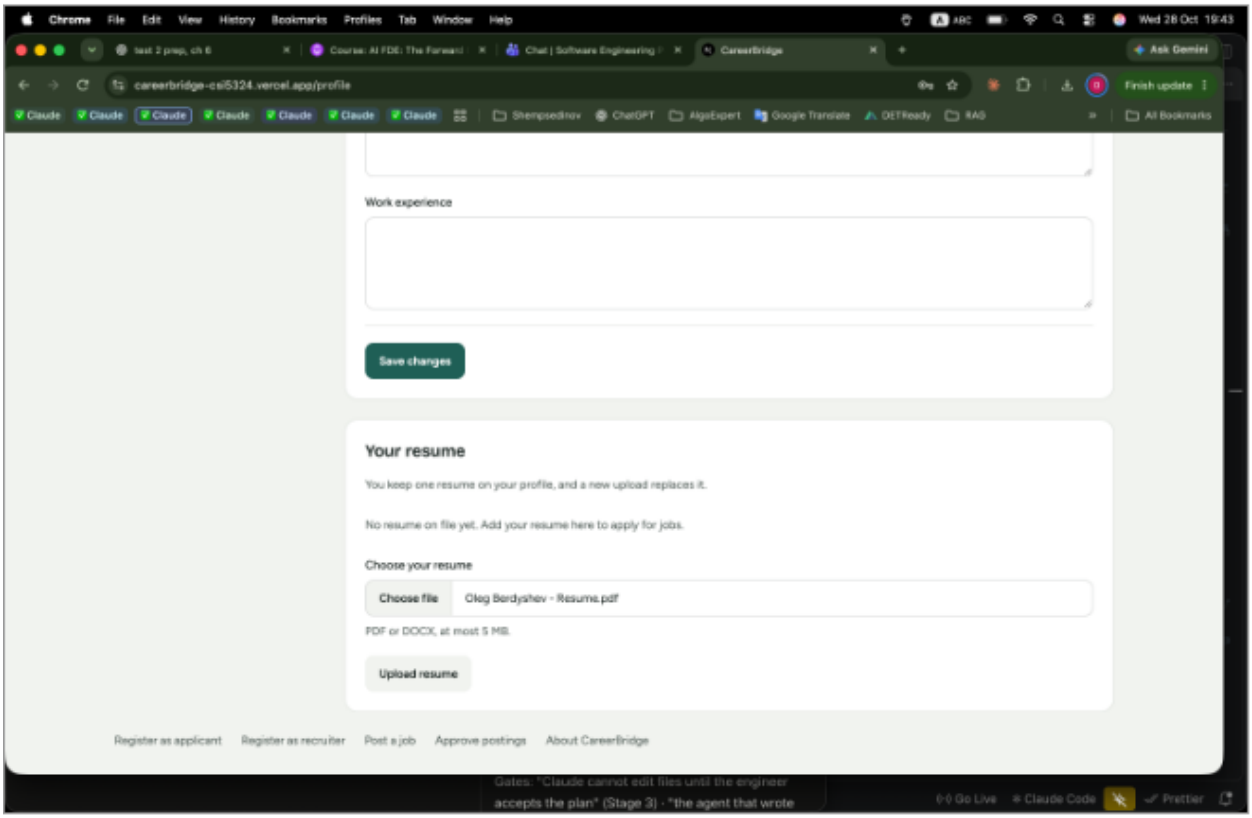

S4. Profile and resume, personal information

Use case	UC-03 Update Applicant Profile
Use case owner	Oleg Berdyshev
UI implemented by	Zeba Tusnia Towshi (first version, 13 Oct); Oleg Berdyshev (backend-connected version, 25–27 Oct)
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** Shows the logged-in applicant's data; the email cannot be changed here.
Route / source	`/profile; live site, careerbridge-csi5324.vercel.app/profile`

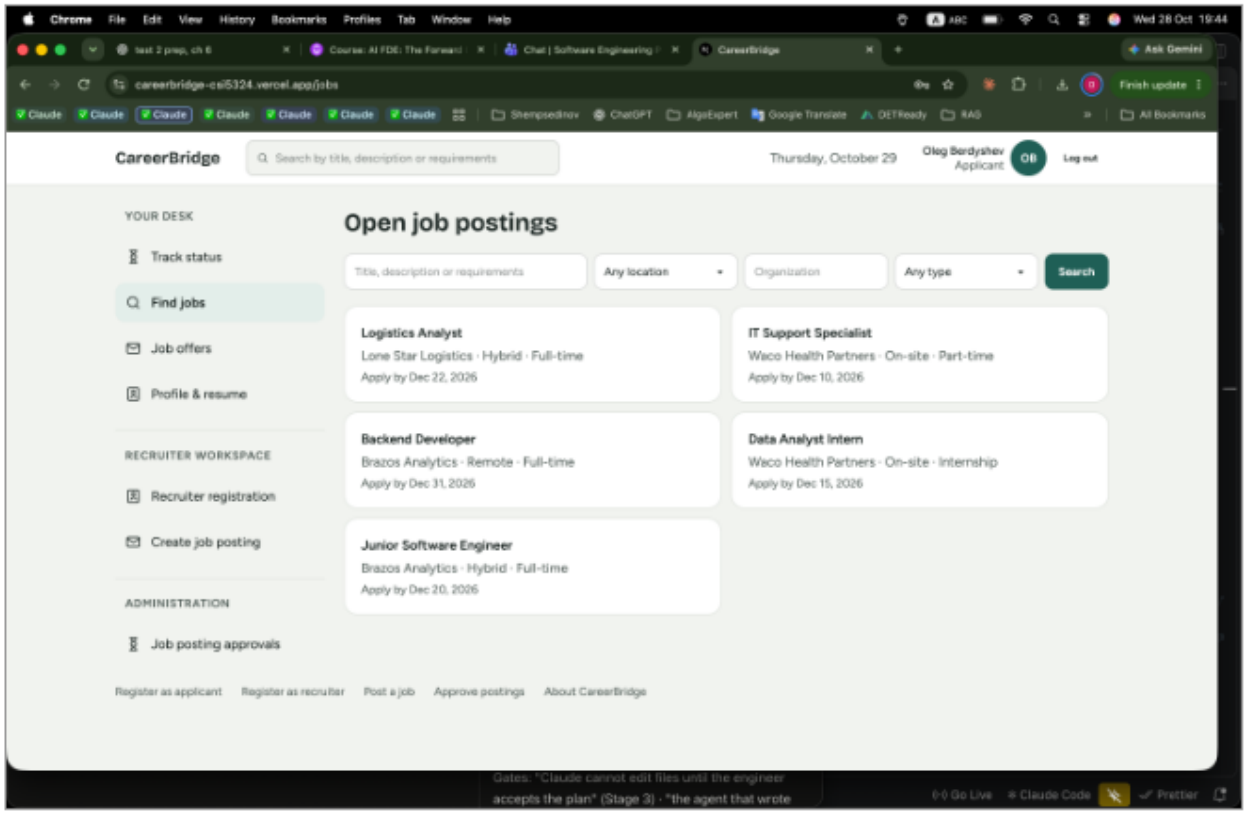

S5. Profile and resume, resume upload (scrolled)

Use case	UC-03 Update Applicant Profile
Use case owner	Oleg Berdyshev
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** One resume per applicant, PDF or DOCX up to 5 MB; a new upload replaces it.
Route / source	`/profile; live site, careerbridge-csi5324.vercel.app/profile`

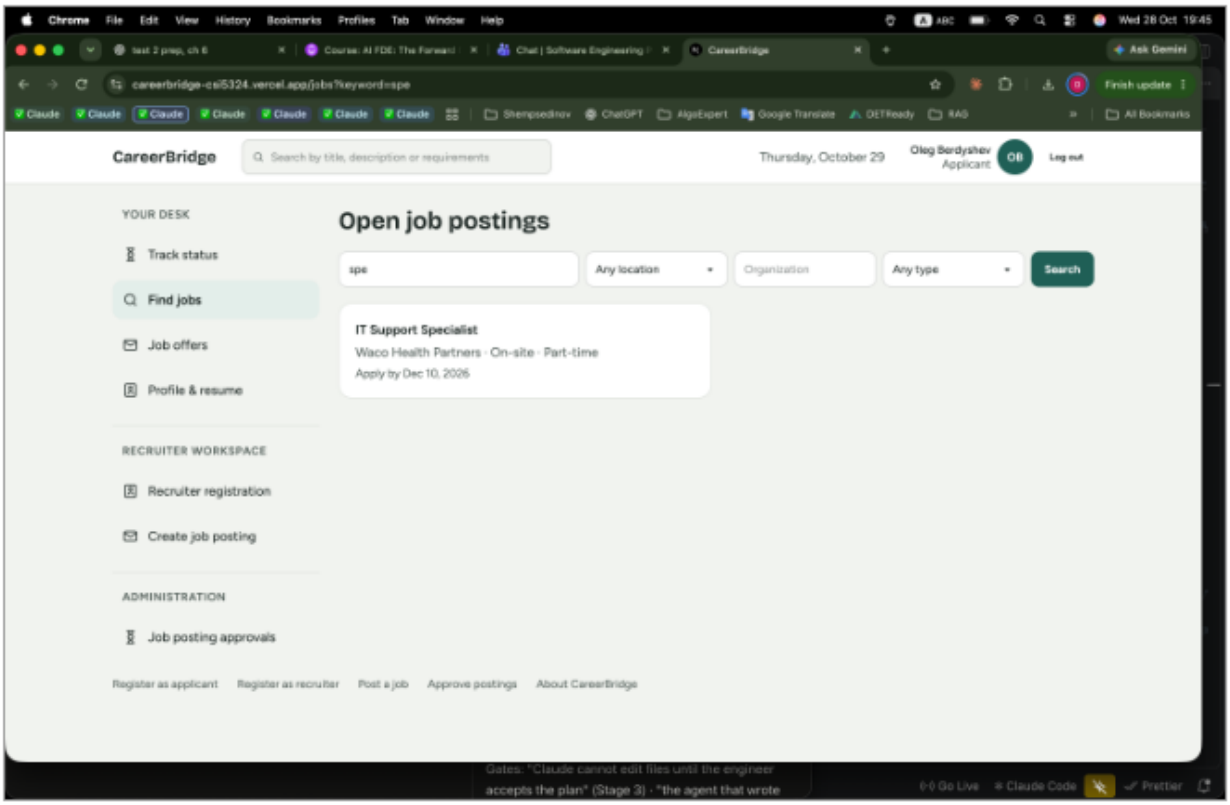

S6. Open job postings

Use case	UC-01 Search Job Postings
Use case owner	Oleg Berdyshev
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** Filters: keyword, location, organization, employment type.
Route / source	`/jobs; live site, careerbridge-csi5324.vercel.app/jobs`

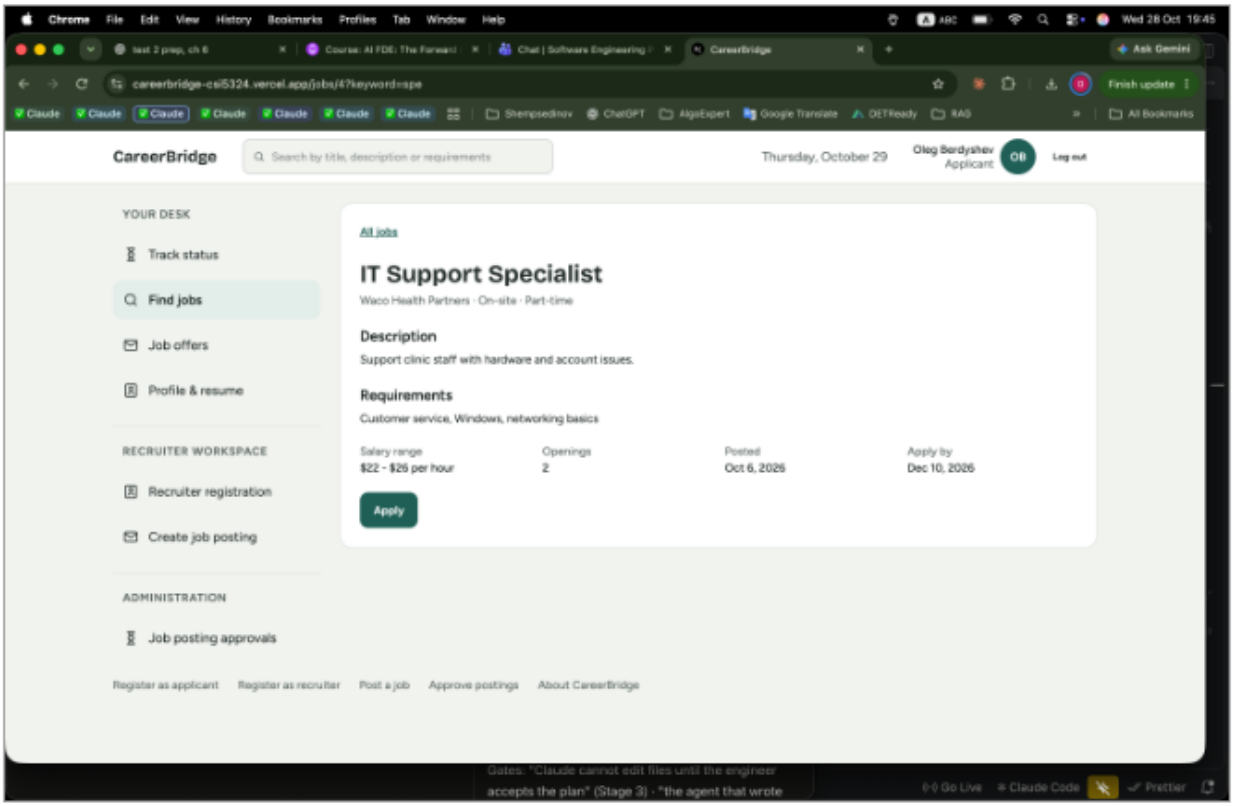

S7. Search results for the keyword “spe”

Use case	UC-01 Search Job Postings
Use case owner	Oleg Berdyshev
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** Only the matching posting is listed.
Route / source	`/jobs?keyword=spe; live site, careerbridge-csi5324.vercel.app/jobs?keyword=spe`

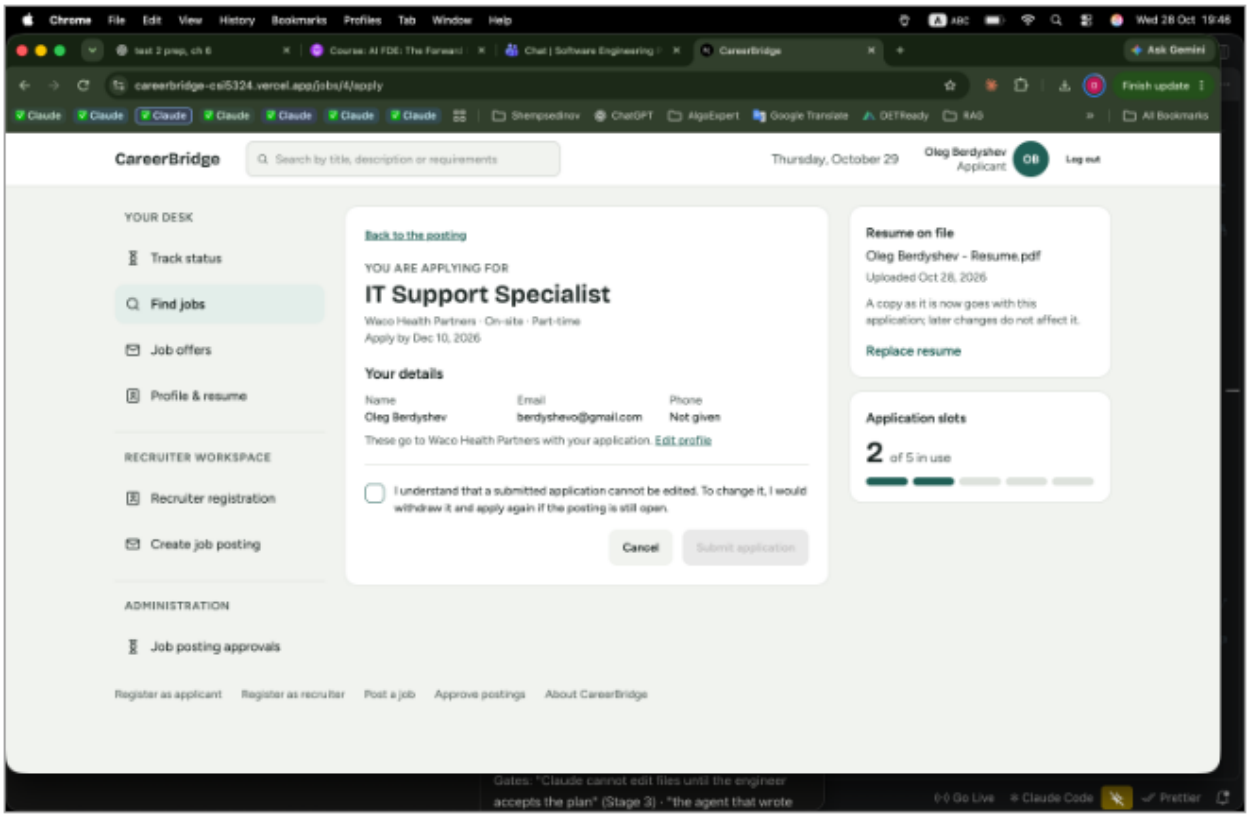

S8. Job posting details

Use case	UC-01 Search Job Postings
Use case owner	Oleg Berdyshev
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** Leads to UC-04 through the Apply button.
Route / source	`/jobs/4; live site, careerbridge-csi5324.vercel.app/jobs/4`

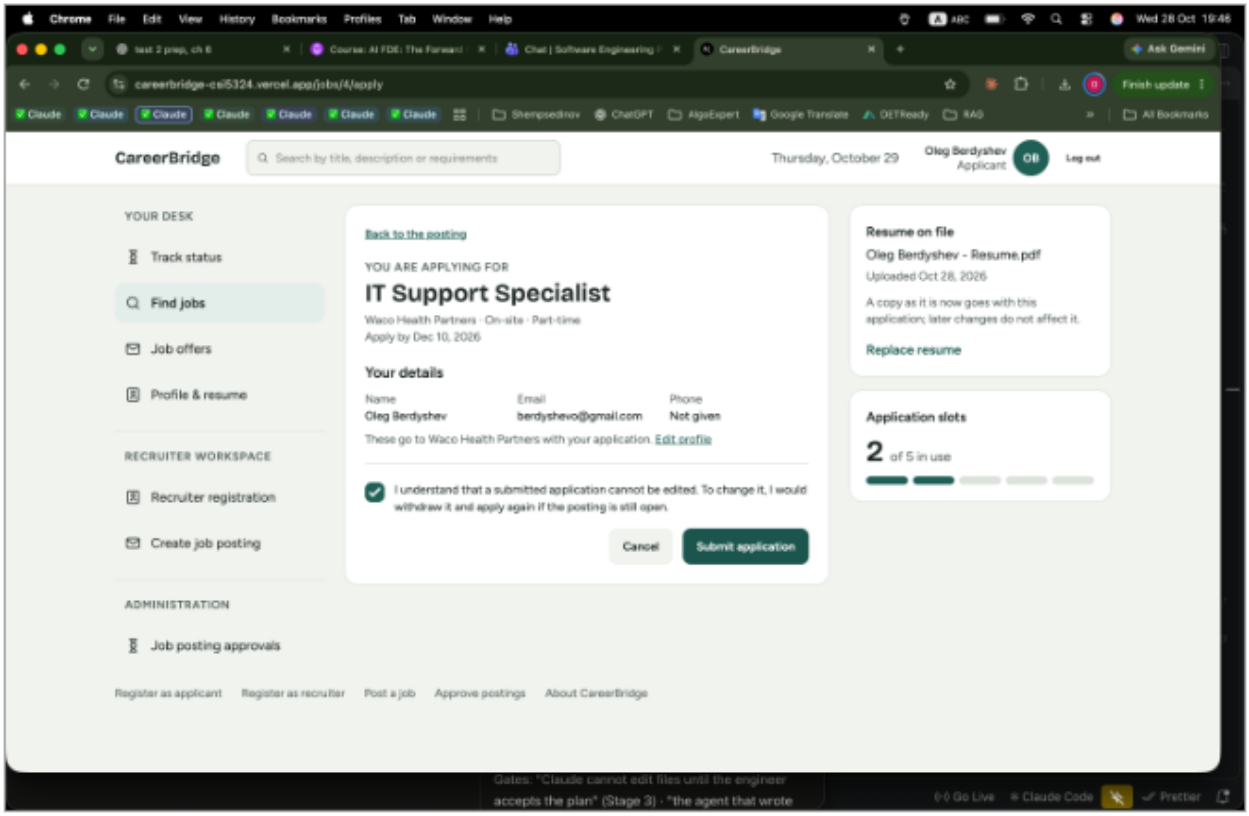

S9. Apply for the job, before confirming

Use case	UC-04 Apply for Job
Use case owner	Josh Job Joseph
UI implemented by	Oleg Berdyshev (first screen, resume on file); Josh Job Joseph (start and submit through /application, check against active applications)
Backend implemented by	Josh Job Joseph and Oleg Berdyshev
Connected to the application layer	**Connected.** Submit stays disabled until the applicant confirms.
Route / source	`/jobs/4/apply; live site, careerbridge-csi5324.vercel.app/jobs/4/apply`

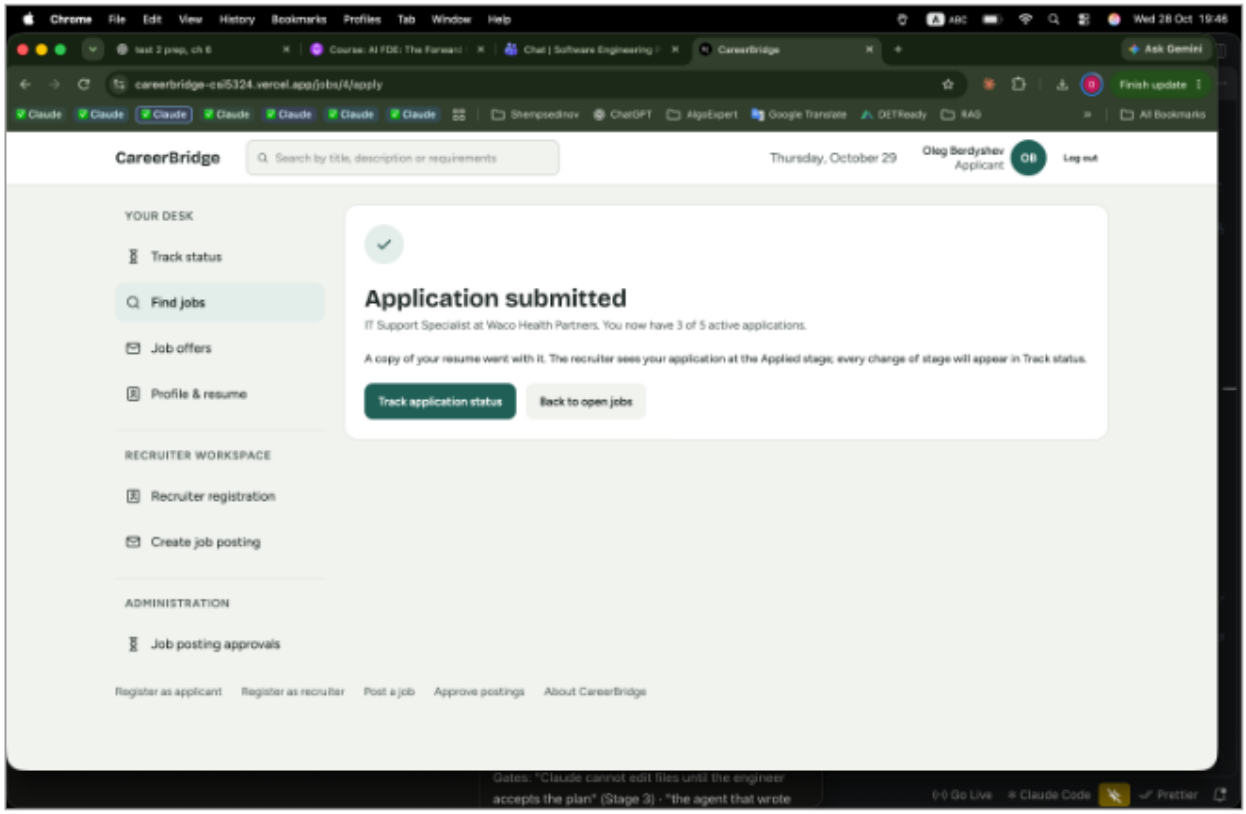

S10. Apply for the job, confirmed

Use case	UC-04 Apply for Job
Use case owner	Josh Job Joseph
UI implemented by	Oleg Berdyshev; Josh Job Joseph
Backend implemented by	Josh Job Joseph and Oleg Berdyshev
Connected to the application layer	**Connected.** The five-application limit is shown as “2 of 5 in use”.
Route / source	`/jobs/4/apply; live site, careerbridge-csi5324.vercel.app/jobs/4/apply`

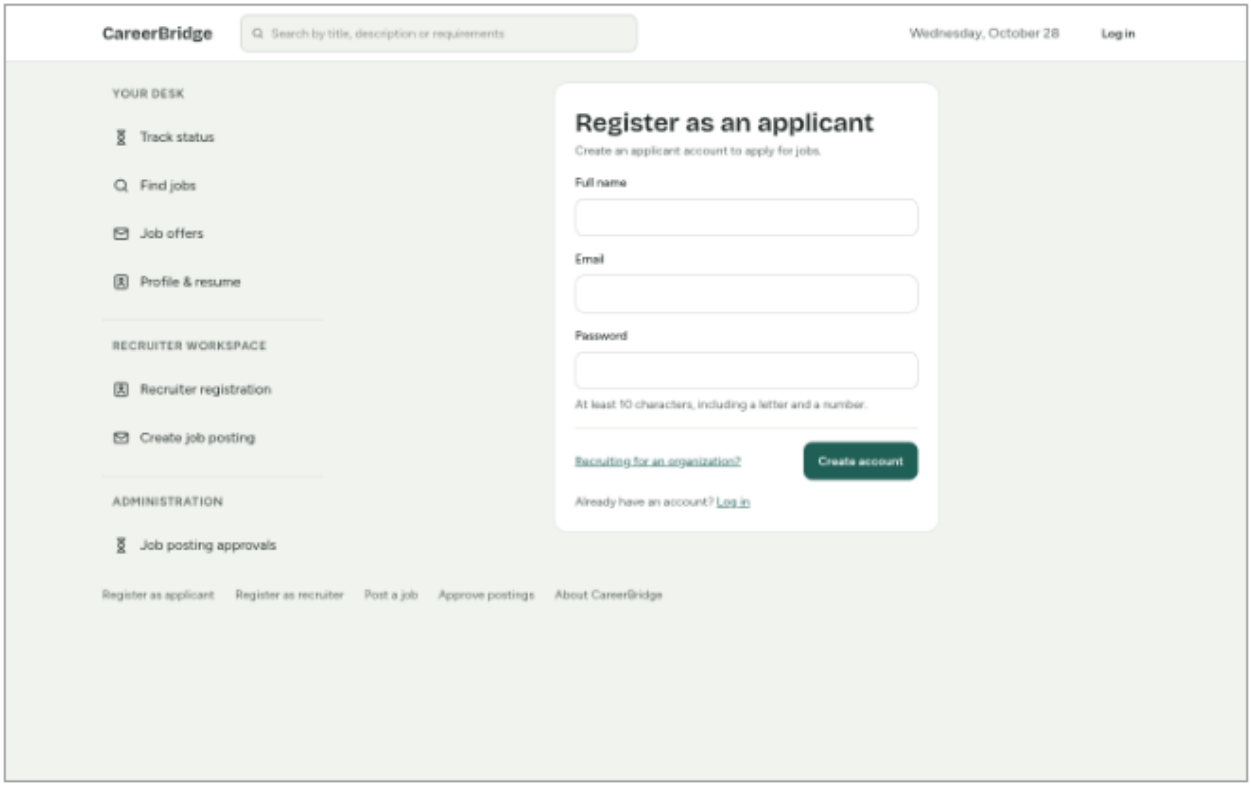

S11. Application submitted

Use case	UC-04 Apply for Job
Use case owner	Josh Job Joseph
UI implemented by	Oleg Berdyshev; Josh Job Joseph
Backend implemented by	Josh Job Joseph and Oleg Berdyshev
Connected to the application layer	**Connected.** The count moved from 2 to 3 of 5 active applications.
Route / source	`/jobs/4/apply; live site, careerbridge-csi5324.vercel.app/jobs/4/apply`

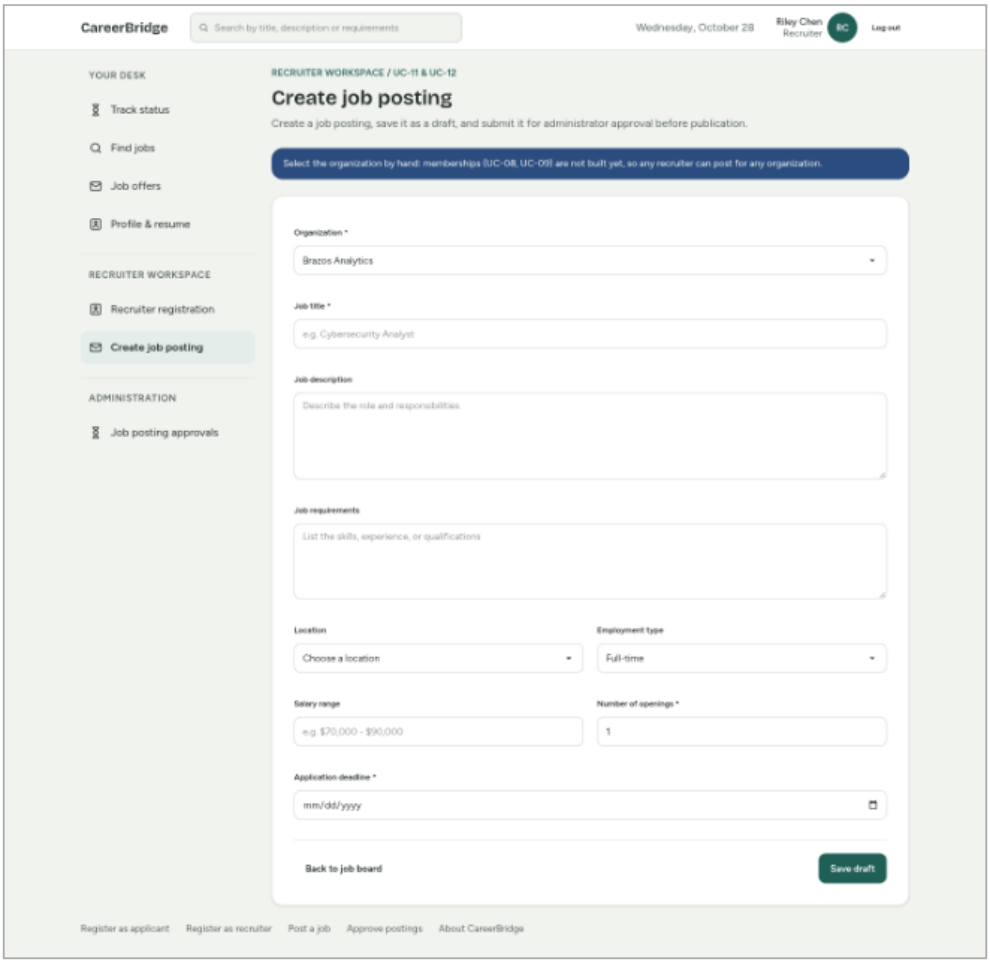

S12. Register as an applicant

Use case	UC-02 Register as Applicant
Use case owner	Oleg Berdyshev
UI implemented by	Oleg Berdyshev
Backend implemented by	Oleg Berdyshev
Connected to the application layer	**Connected.** Form shown empty; nothing was submitted.
Route / source	`/register; local run of main, localhost:3000/register`

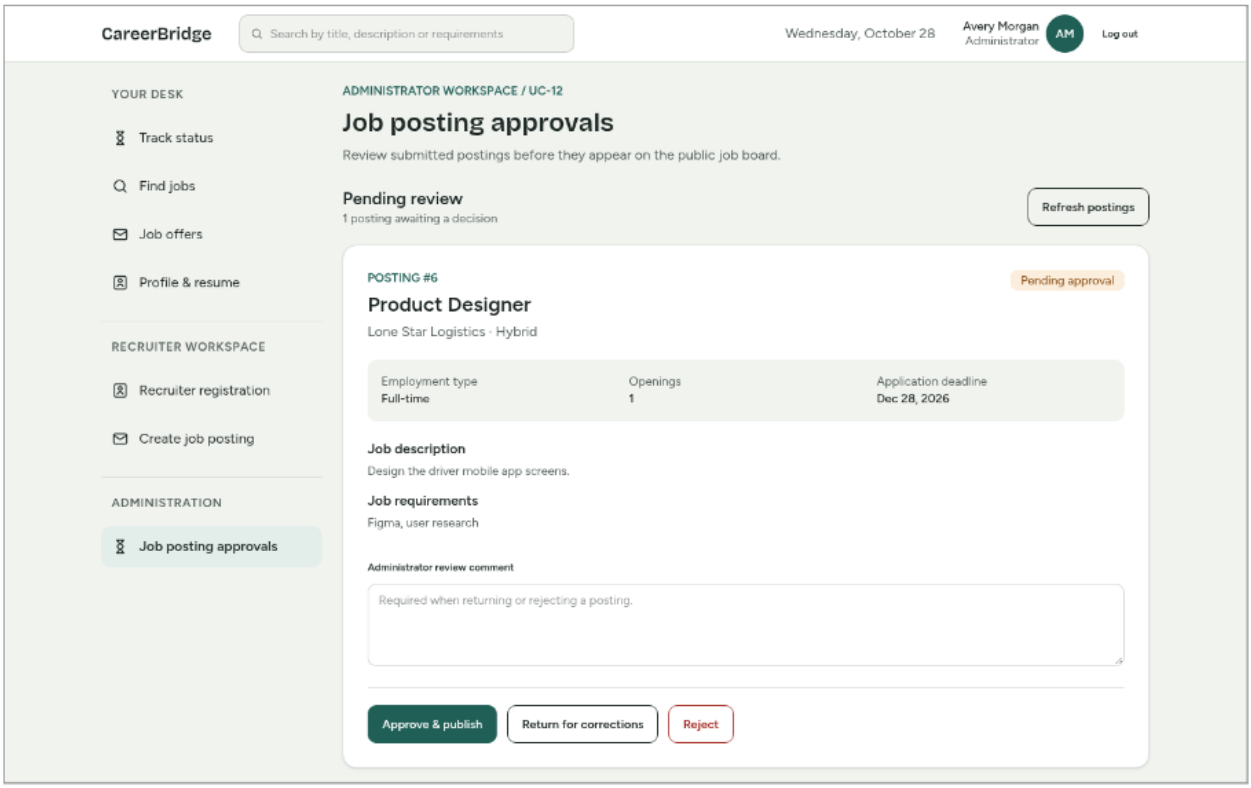

S13. Create job posting (recruiter)

Use case	UC-11 Create Job Posting
Use case owner	Zeba Tusnia Towshi
UI implemented by	Zeba Tusnia Towshi (13 Oct); later changes by Oleg Berdyshev
Backend implemented by	Zeba Tusnia Towshi; later changes by Oleg Berdyshev
Connected to the application layer	**Connected.** Form shown empty. The banner says memberships (UC-08, UC-09) are not built, so any recruiter can post for any organization.
Route / source	`/recruiter/postings/new; local run of main, localhost:3000/recruiter/postings/new`

Use case	UC-12 Approve Job Posting
Use case owner	Zeba Tusnia Towshi
UI implemented by	Zeba Tusnia Towshi (13 Oct); review fixes and login by Oleg Berdyshev
Backend implemented by	Zeba Tusnia Towshi; review fixes by Oleg Berdyshev
Connected to the application layer	**Connected.** Approve and publish, return for corrections, or reject with a comment. No decision was made for the screenshot.
Route / source	`/admin/postings; local run of main, localhost:3000/admin/postings`

Use case	UC-05 Track Application Status
Use case owner	Rabeya Nazara
UI implemented by	Placeholder only
Backend implemented by	viewApplications exists on the backend; its page does not use it
Connected to the application layer	**Not connected.** Page says “Not implemented yet”. Withdraw (UC-06) will also live here.
Route / source	`/applications; local run of main, localhost:3000/applications`
